

[HummingbirdWebSocket](#) / WebSocketRouterContext

Structure

WebSocketRouterContext

WebSocket Context for upgrades initiated via a router

```
struct WebSocketRouterContext<Context> where Context : WebSocketContext
```

Overview

Include the HTTP request and context that initiated the WebSocket connection

Topics

Instance Properties

`var logger: Logger`

Logger attached to request context

`let request: Request`

HTTP request that initiated the WebSocket connection

`let requestContext: Context`

Request context at the time of WebSocket connection was initiated

Relationships

Conforms To

`Swift.Sendable`, `WebSocketContext`

See Also

Router

`protocol WebSocketRequestContext`

Request context protocol requirement for routers that support WebSockets

`struct BasicWebSocketRequestContext`

Default implementation of a request context that supports WebSockets

`struct WebSocketHandlerReference`

Reference to a WebSocket handler

`struct WebSocketUpgradeMiddleware`

An alternative way to add a WebSocket upgrade to a router via Middleware

`enum RouterShouldUpgrade`

Enum indicating whether a router `shouldUpgrade` function expects a WebSocket upgrade or not
