

[JobsRedis](#) / [RedisJobQueue](#) / RedisJobQueue.JobID

## Structure

# RedisJobQueue.JobID

Inherited from `JobQueueDriver.JobID`.

```
struct JobID
```

## Topics

### Initializers

```
init?(fromRESP: RedisStack.RESPValue)
```

### Instance Properties

```
var description: String
    String description of Identifier
```

### Instance Methods

```
func convertedToRESPValue() -> RedisStack.RESPValue
```

### Default Implementations

 Equatable Implementations

# Relationships

## Conforms To

`RedisStack.RESPValueConvertible`

`Swift.CustomStringConvertible`

`Swift.Equatable`

`Swift.Sendable`
