

[JobsPostgres](#) / [PostgresJobQueue](#) / `init(client:migrations:configuration:logger:)`

Initializer

`init(client:migrations:configuration:logger:)`

Initialize a PostgresJobQueue

```
init(  
    client: PostgresClient,  
    migrations: DatabaseMigrations,  
    configuration: Configuration = .init(),  
    logger: Logger  
) async
```
