

[Hummingbird](#) / HTTPResponseError

Protocol

HTTPResponseError

An error that is capable of generating an HTTP response

```
protocol HTTPResponseError : ResponseGenerator, Error
```

Overview

By conforming to HTTPResponseError you can control how your error will be presented to the client. Errors not conforming to this will be returned with status `internalServerError`.

Topics

Instance Properties

```
var status: HTTPResponse.Status
```

status code for the error

Required
