

[HummingbirdTLS](#) / TLSChannelConfiguration

Structure

TLSChannelConfiguration

TLSChannel configuration

```
struct TLSChannelConfiguration
```

Topics

Initializers

```
init(tlsConfiguration: TLSConfiguration, customAsyncVerification  
Callback: ([NIOSslCertificate]) async throws -> NIOSSLVerification  
Result)
```

Initialize TLSChannel.Configuration

```
init(tlsConfiguration: TLSConfiguration, customVerificationCallback:  
CustomVerificationCallback?)
```

Initialize TLSChannel.Configuration

Instance Properties

```
let customVerificationCallback: CustomVerificationCallback?
```

A custom verification callback that allows completely overriding the certificate verification logic of BoringSSL.

```
let tlsConfiguration: TLSConfiguration
```

Type Aliases

`typealias CustomVerificationCallback`

Relationships
