

[Hummingbird](#) / [MediaType](#) / MediaType.Category

Structure

MediaType.Category

Media type categories

```
struct Category
```

Topics

Initializers

```
init?(rawValue: String)
```

Instance Properties

```
var description: String
```

```
var rawValue: String
```

Type Properties

```
static var any: `Self`
```

```
static var application: `Self`
```

```
static var audio: `Self`
```

```
static var example: `Self`
```

```
static var font: `Self`
```

```
static var image: `Self`  
  
static var message: `Self`  
  
static var model: `Self`  
  
static var multipart: `Self`  
  
static var text: `Self`  
  
static var video: `Self`
```
