

[Hummingbird](#) / [RouterPath](#) / flatMap(\_:) **Deprecated**

Instance Method

# flatMap(\_:) **Deprecated**

Inherited from `Sequence.flatMap(_:)`.

 [Hummingbird](#) |  [Swift](#) | [Swift](#) **Deprecated**

```
func flatMap<ElementOfResult>(_ transform: (Self.Element) throws -> ElementOfResult?) rethrows -> [ElementOfResult]
```

## Deprecated

Please use `compactMap(_:)` for the case where closure returns an optional value
