

[HummingbirdWe...](#) / [HTTP1WebSocketUpgradeChannel](#)[init\(responder:webSocketResponder:configuration:additionalCh...](#)

Initializer

init(responder:webSocketResponder:configuration:additionalChannelHandlers:)

Initialize HTTP1WebSocketUpgradeChannel with async shouldUpgrade function

```
init<WSResponder>(  
    responder: @escaping HTTPChannelHandler.Responder,  
    webSocketResponder: WSResponder,  
    configuration: WebSocketServerConfiguration,  
    additionalChannelHandlers: @escaping () -> [any RemovableChannel  
Handler] = { [] }  
) where WSResponder : HTTPResponder, WSResponder.Context : WebSocket  
RequestContext
```

Discussion

- responder: HTTP responder
- webSocketResponder: WebSocket initial request responder
- configuration: WebSocket configuration
- additionalChannelHandlers: Additional channel handlers to add
