

[HummingbirdHTTP2](#) / TLSChannelConfiguration

## Structure

# TLSChannelConfiguration

TLSChannel configuration

```
struct TLSChannelConfiguration
```

## Topics

### Initializers

```
init(tlsConfiguration: TLSConfiguration, customAsyncVerification  
Callback: ([NIOSslCertificate]) async throws -> NIOSSLVerification  
Result)
```

Initialize TLSChannel.Configuration

```
init(tlsConfiguration: TLSConfiguration, customVerificationCallback:  
CustomVerificationCallback?)
```

Initialize TLSChannel.Configuration

### Instance Properties

```
var customVerificationCallback: CustomVerificationCallback?
```

A custom verification callback that allows completely overriding the certificate verification logic of BoringSSL.

```
var tlsConfiguration: TLSConfiguration
```

## Type Aliases

`typealias CustomVerificationCallback`

---

## Relationships

### Conforms To

`Swift.Sendable`
