

[Hummingbird](#) / [ApplicationProtocol](#) / onServerRunning(\_:)

Instance Method

# onServerRunning(\_:)

This is called once the server is running and we have an active Channel

```
@Sendable  
func onServerRunning(_ channel: Channel) async
```

**Required** Default implementation provided.

## Default Implementations

### ApplicationProtocol Implementations

```
func onServerRunning(Channel) async  
    Default onServerRunning that does nothing
```
