

[Hummingbird](#) / [Router](#) / on(\_:method:responder:)

## Instance Method

# on(\_:method:responder:)

Add responder to call when path and method are matched

```
@discardableResult
func on<Responder>(
    _ path: RouterPath,
    method: HTTPRequest.Method,
    responder: Responder
) -> Self where Context == Responder.Context, Responder : HTTPResponder
```

## Parameters

### path

Path to match

### method

Request method to match

### responder

Responder to call if match is made
