

[Hummingbird](#) / [RouterPath](#) / split(separator:maxSplits:omittingEmptySubsequences:)

Instance Method

split(separator:maxSplits:omittingEmptySubsequences:)

Inherited from `Collection.split(separator:maxSplits:omittingEmptySubsequences:)`.

 Hummingbird |  Swift

```
func split(
    separator: Self.Element,
    maxSplits: Int = Int.max,
    omittingEmptySubsequences: Bool = true
) -> [Self.SubSequence]
```

Available when `Element` conforms to `Equatable`.
