

[HummingbirdHTTP2](#) / [HTTP2UpgradeChannel](#) / init(tlsConfiguration:additionalChannelHandlers:responder:)

## Initializer

# init(tlsConfiguration:additionalChannelHandlers:responder:)

Initialize HTTP2Channel

```
init(  
    tlsConfiguration: TLSConfiguration,  
    additionalChannelHandlers: @escaping () -> [any RemovableChannel  
Handler],  
    responder: @escaping HTTPChannelHandler.Responder  
) throws
```

## Parameters

### tlsConfiguration

TLS configuration

### additionalChannelHandlers

Additional channel handlers to add to stream channel pipeline after HTTP part decoding and before HTTP request handling

### responder

Function returning a HTTP response for a HTTP request
