⊟ **Documentation**   Language: Swift

Humming… / CORSMiddleware / init(allowOrigin:allowHeaders:allowMethods:allowCredentials:exposedHeaders:max

Initializer

init(allowOrigin:allowHeaders:allow Methods:allowCredentials:exposed Headers:maxAge:)

Initialize CORS middleware

```swift
init(
    allowOrigin: AllowOrigin = .originBased,
    allowHeaders: [HTTPField.Name] = [.accept, .authorization, .contentType,
    allowMethods: [HTTPRequest.Method] = [.get, .post, .head, .options],
    allowCredentials: Bool = false,
    exposedHeaders: [String]? = nil,
    maxAge: TimeAmount? = nil
)
```

Parameters

allowOrigin
   Allow origin enum

allowHeaders
   Array of headers that are allowed

allowMethods
   Array of methods that are allowed

allowCredentials

Are credentials alloed

exposedHeaders

Array of headers that can be exposed back to the browser

maxAge

How long the results of a pre-flight request can be cached
