🔲 **Documentation**   Language: Swift

Instance Method

compressed(algorithm:configuration:windowSize:logger:)

Return ResponseBodyWriter that compresses the contents of this ResponseBodyWriter

```swift
func compressed(
    algorithm: ZlibAlgorithm,
    configuration: ZlibConfiguration,
    windowSize: Int,
    logger: Logger
) throws -> some ResponseBodyWriter
```

Return Value

New ResponseBodyWriter

Discussion

- algorithm: Compression algorithm

- windowSize: Window size (in bytes) to use when compressing data

- logger: Logger used to output compression errors
